

ADDED to ANY SPRAYBOOTH or ROOM

Paint Cycle: 55° - 90°

Bake Cycle: 120° - 170°

WEATHERPROOF VERTICAL SYSTEM

- **E.R.S. "ENERGY RECOVERY SYSTEM"**
Automatically "Recycles" heated air thru the input blower to minimize fuel costs.
- **"ENERGY MONITORING SYSTEM"**
Modulating Direct Fire burner holds temp. to within 1° +/- of preset. Controls costs to under \$3.00 per vehicle.

"SMART SENSE" CONTROL PANEL

- **"SMART SENSE" CONTROL PANEL** — memorizes presets for paint temp., bake temp., and bake time. Once set, the painter just turns the system on and paints. No worrying about changing booth condition; consistency ... **EVERY TIME!**
- **"AUTOMATIC BOOTH BALANCE SYSTEM"** — positive pressure, perfectly balanced. Sensors placed in the booth read pressure and the system self-adjusts airflow ... **ALL AUTOMATICALLY!**

WEATHERPROOF ROOF MOUNTED SYSTEM

futurecure.com

Rear vertical AMU w/"I" pit

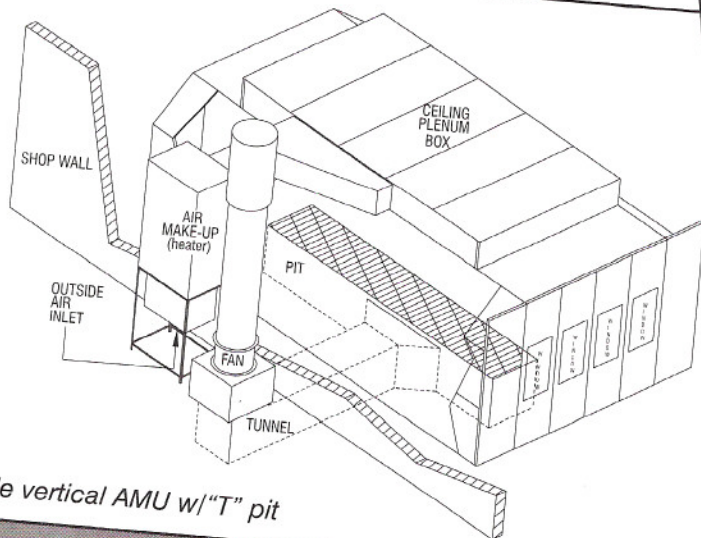

The Air Make-up cabinet is weatherproof and works best when located outside the building.

The versatility of **Future Cure's** Air Make-up (heater) allows a variety of placement locations in conjunction with various pit configurations.

Roof mount AMU w/"L" pit

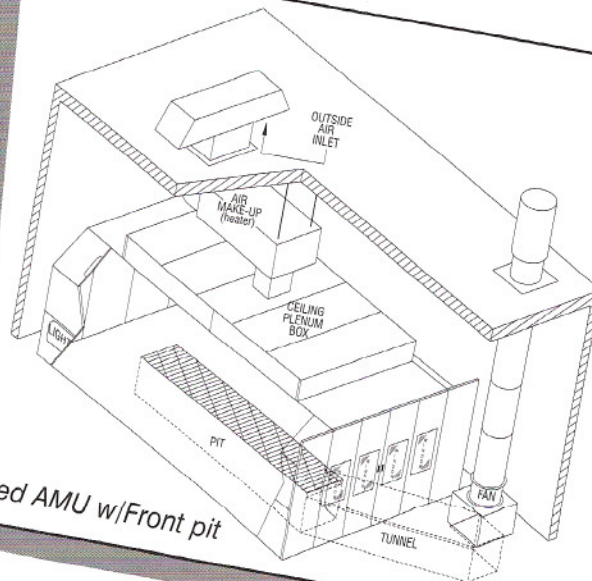

A versatile extraction pit configuration offers optimum booth location in the shop.

Side vertical AMU w/"T" pit

Outside or roof mounted units mean no wasted shop space for booth mechanicals.

Mix & match any combination of pit / AMU designs to best meet your shop needs.

Suspended AMU w/Front pit

"At Future Cure, we design our Air Make-up Systems to meet your needs."
